

# KNOWLEDGE IS POWER.

Arm your clients with the Hiscox CyberClear Academy to protect themselves against a cyber attack.

The Hiscox CyberClear Academy is a Government-certified online cyber security training platform designed to raise cyber security awareness among employees and help protect businesses from cyber threats.

#### Key features

- Training contains nine learning modules allowing employees to understand all aspects of cyber risk, including social engineering, online safety and information handling.
- The content is concise, relevant and is provided at regular intervals, saving time for employees whilst reinforcing key messages. The continual nature of the training also helps to combat complacency and ensures that employees are equipped to deal with this ever-changing threat.
- Every module finishes with a short test to confirm that the content has been clearly understood. The progress of all employees can be monitored by your client's own appointed system administrator.

#### Stay cyber compliant

The Hiscox CyberClear Academy provides cyber awareness training for employees to help meet the requirements of regulators across Europe. Under the new General Data Protection Regulation, due to come into force in May 2018, organisations must implement 'appropriate technical and organisational measures' to protect the data they hold and process. Employee cyber awareness training constitutes a key operational measure.

#### Accredited

The Hiscox CyberClear Academy has been accredited by GCHQ, the UK's intelligence agency responsible for cyber security. This high-quality training provides employees with the knowledge they need to help organisations stay cyber-secure.

#### Policy incentive

If 80% of clients' employees successfully complete the learning pathways, the excess shown in the schedule is reduced by £2,500 (€2,500 for Ireland). If the excess shown in the schedule is £2,500 (€2,500 for Ireland) or lower, no excess is payable.

#### Access

Access will automatically be granted to all Hiscox Cyber and Data policyholders with a revenue of below £10,000,000 or €10,000,000. Instructions on how to register for the first time will be included in their policy documentation.
