SCHEMES

A scheme is different from a traditional insurer/broker partnership in that it is broker-led and builds on a key insight into a particular sector.

Our schemes team work in partnership with you to develop a vision into a bespoke offering for clients.

Making your scheme a reality

- Analysts work with you to research the market opportunity and viability.
- A dedicated project manager will coordinate the underwriting, legal, claims, marketing and e-commerce teams at Hiscox to launch the scheme.
- You will then be assigned a regional owner who will take accountability for your scheme and provide regular reviews.

Tell us about your existing scheme or a new scheme idea.
